

Want to know who buzzed in second, and their time compared to first place? The **2nd Place Timer** is now available as an option.

QUIZBOX WITH TIMER 2nd Generation

(Comes with 8 handpads, not shown)

- The quizbox will show who responded first out of 8 quizzers. It will turn their light on, sound a tone, and lock everybody else out until reset. There are quizzier lights on the front and back of the box, so everyone can see.

The built-in timer provides the following time intervals:

- 5 seconds if no one buzzes in.
- 30 seconds to give an answer.
- 45 seconds for a time-out.
- 1, 2 and 3 minutes for conferring and contesting.

- A **2nd Place Timer** is available as an option. When purchased, the box can work normally, or it can show who buzzed in first, 2nd and 3rd, and the time difference between first and second place, from one 10 thousandth of a second (.00010) to .999 seconds.
- A **Reaction Timer** mode is also available as an option. The box shows who responded first to a randomly generated beep, and their response time in milliseconds. Great for speed drills.
- New last season - more robust handpad wires.
- A Scoreboard Connector is available. If your church or district will want a scoreboard sometime, get the connector.
- Handpads plug in individually thru quad extension cables.
- It will connect to other quizboxes for multi-team quizzes.
- An AC Adapter and 8 handpads are included.

- It shows who was first out of 8 quizzers and has a poor-man's timer.
- When someone buzzes in, the timer light will blink 30 seconds, then the box will beep when time expires.
- It can be programmed for a different timer interval for programs where that might be needed.
- In a quiz, it would be positioned near the two teams, with a reset pad located by the quizmaster.
- It is powered by a 5 volt phone charger.
- It comes with the power supply and up to 9 handpads.
- Small size: approximately 3 1/4 x 3 1/4 x 1 1/2 inches deep
- It can also show 2nd and 3rd place, if desired.

Basic Quizbox

New optional timer/reset box plugs in the quizbox reset jack (instead of a reset switch) and gives the timer intervals used in most quizzier programs.

A small battery-operated quizbox for 4 quizzers

- Use one at home or on the road for individual or small group practice.
- Connect 2 or more together and use them at meets or practices.
- It includes a poor-man's timer: There is no clock display, but it beeps and resets after 30 seconds.
- It is available with red, yellow or green lights, or half red / half green.
- Optional AC adapters are available.
- Buy it with or without handpads. Any handpads with RCA jacks will plug in and work. Borrow ones from your other quizbox??
- It will connect to other quizboxes for multi-team quizzes.

POCKET QUIZZER

HANDBUZZERS

A standard handpad, but with a battery and beeper inside. Useful for practices at home.

USB HANDPAD

A standard handpad, but with a USB connector. For use with PC programs like Accubuzz and those found at pfjbq.com.

Multi-team quizzing: Pocket Quizzer and the Quizbox with Timer (2nd Gen) can interconnect for multi-team quizzing. The first quizzer on any box will lock out all the other boxes. For example, you can connect a Pocket Quizzer to a 2nd Generation Quizbox with Timer and quiz with 12 kids, or two Timer boxes for 16 kids. Older quizboxes with the Remote Standard connector can also connect in.

Carrying cases: Unless otherwise specified, all quizboxes are shipped in a cardboard box. Each quizbox can also fit in a briefcase, which is better for storage and handling. Briefcases are optional, and are also available from office supply stores such as Office Depot.

Warranty:

- 2 years on most quizboxes and 1 year on the handpads. That does not include cosmetic damage, user modifications or abuse.
- 90 days on the cables, AC adapters and briefcases. (No workmanship is involved on my part, and I can't control how you treat them.)
- If anything goes wrong, please call first. Maybe it can be fixed over the phone or by sending a part.

How to order:

Call or e-mail to confirm delivery dates and prices. I can e-mail you a bill to turn in to the treasurer. Payment is required before the quizbox will ship. (Or for a COD fee of approximately \$13, the box can ship first and you give the check to the UPS man.) PayPal is accepted, but their fee will be added to the total. Credit cards are not currently accepted.

Be sure to include a street address for UPS, and a mailing address for Post Office deliveries.

At Home Quizboard

Stuck at home but still want to practice?

This low cost circuit will determine the first to respond out of 3 quizzers, lock the others out and beep. The circuit board is mounted to a piece of wood; there is no enclosure.

Power it by a phone charger and a micro USB cable. These are not included in the price, but available at additional cost if needed. Handpads are extra, if you don't have any to use.
